For Immediate Release

### **Faxitron to Release New Specimen Radiography Software at RSNA**

WHEELING, Illinois (November 21, 2007) – Faxitron X-Ray LLC (Faxitron) today announced that it will release a new, feature-rich version of software for their widely-used DX-50 and MX-20 Digital Specimen Radiography Systems at the annual meeting of the Radiological Society of North America (RSNA) being held November 25-30, 2007 at McCormick Place in Chicago, IL.

The software introduces two key time-saving tools for medical professionals. *ImageAssist*<sup>™</sup> combines advanced Automatic Exposure Control, automatic window leveling and auto-sharpening to provide optimal imaging of all specimens with a single click. *ImageAssist* delivers true ease-of-use and superior images the first time, every time, in less time. Adding a new facet of support, *Faxitron On Call*<sup>™</sup> allows for real-time, remote system consultation with Faxitron specialists. The service is designed to be used in environments that must comply with HIPAA regulations. Applications support and training as well as diagnostic checks and upgrades are easily performed remotely by factory trained personnel.

#### **About Faxitron X-Ray LLC**

Faxitron X-Ray LLC is the global leader in cabinet x-ray systems for specimen radiography, research, and NDT applications. With an installed base of over 5000 systems in medical facilities and scientific and industrial laboratories around the world, Faxitron is the industry standard in cabinet x-ray. For over 30 years, Faxitron has defined cabinet x-ray by developing innovative products to meet the evolving needs of our customers. From film to the latest in digital imaging technology, the company's focus on quality and ease-of-use continues to earn the trust and repeat business of its customers.
